BERDAL FAMILY

Berdal has been working on more sustainable business operations for almost 30 years. In order to share our sustainability policy with stakeholders, we created a video presenting our initiatives. This video is aiming to convey the message to our relations, employees and suppliers that sustainability is not a matter of discussion but of action! Sustainability and circular building require concrete actions. We believe that collaboration within the chain, sustainability and innovation go hand in hand. Using the themes below, we will show what aspects we believe are important when it comes to sustainable and corporate social responsibility:

1. The people
2. The raw materials
3. Our logistics
4. The environment
5. Our initiatives

CIRCULAR ECONOMY

We are aware of our responsibilities towards the environment and sustainable production. We believe in a circular economy and always strive for environment-conscious solutions. We are the only supplier in Europe delivering a range of EPDM products for roofs and facades that are Cradle-to-Cradle certified. This is how we make an important contribution to the circular economy. The central idea behind the certification is that all materials used in one product can be favourably used in another product after its operating life, without any loss of quality and value. The latter distinguishes Cradle-to-Cradle from traditional recycling.

PRODUCT UNDER OWN MANAGEMENT

Our modern building and well-equipped machinery are situated at business park Twente in Almelo. The production takes place fully under in-house management in the Netherlands and Poland. Approximately 60% of the total production is exported to 14 different countries. Regardless of the Berdal product you select, sustainability is guaranteed without compromises in terms of quality.

GRIPLINE[®]

**SUSTAINABLE QUALITY
MADE IN EUROPE**

MEMBER OF THE BERDAL FAMILY

GRIPLINE®

Our Gripline range aims for a combination of the most sustainable and qualitative solutions in rubber and plastic applications. The product range includes construction buckets, construction tubs, customisable printed IML buckets, knee pads, rubber hammers, mallet caps and door buffers. These products are produced fully under in-house management in the Netherlands and Poland. Besides an extensive range for professionals and DIY we offer you, as a partner, smart additional services such as database management, shelf planning and sales & in-store promotion.

ENVIRONMENTALLY CONSCIOUS PRODUCED DURABLE BUCKETS

The TÜV certified buckets from the Durable series are more lightweight than standard buckets. This ensures a reduced CO2 emission during the production process, without any compromises as to the quality. An adjusted inclination ensures more air in between the buckets. This means no more prying to loosen them, which saves time. Moreover, the strong smell usually accompanying plastic buckets and containers is a thing from the past. This makes our products a lot more attractive for a prominent (point-of-sale) position on the shop floor.

CRANEABLE: FOR HEAVY HOISTING OPERATIONS

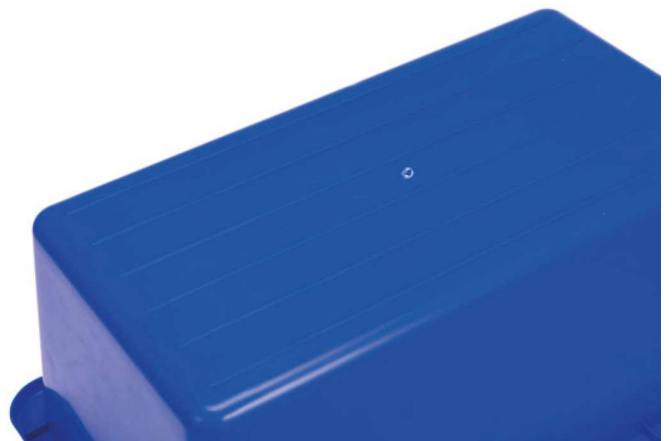

The buckets, tubs and containers of the Craneable series are provided with extra reinforced wall thicknesses and handles. These TÜV certified products are made of tear-resistant materials and therefore suitable for heavy hoisting operations.

CUSTOM DIMENSIONS IN OUR SPECIALS SERIES

Specials are Gripline products not covered by the classification buckets, tubs or containers. These items have, for example, custom volumes (100 or 150 litres), such as our Flex Tub or mixing tubs. And it goes without saying that we also produce buckets in deviating or distinctive colours upon request.

ORIGINAL FOR SEVERAL PURPOSES

The buckets, tubs and containers of the Original series offer our trusted quality. The products have a uniform look and can be used for several purposes. The TÜV and Der Blaue Engel quality mark guarantee a high-quality, sustainable product.

Durable bucket with knob handle and liter scale

KNEE PADS FOR PROFESSIONALS AND DIY

Gripline knee pads offer user convenience to professionals and DIY enthusiasts for different applications. The Gripline Tuinman, for instance, is extremely suitable for light use by professionals and DIY enthusiasts. The Gripline Harmonica is an essential tool for road workers and gardeners. The knee pads Tuinman no. 14, Harmonica no. 13, Harmonica no. 13V and Harmonica Comfort are DIN 14404-EN: 2010 certified. The pressure distribution, resistance to penetration and impact have been tested extensively in practice, as are the elasticity and comfort.

FENTO

**PERFECTLY FIT
FOR COMFORT
& PROTECTION**

PARTNER OF THE BERDAL FAMILY

FENTO knee pads are developed in collaboration with physiotherapists, based on practical user experiences. The perfect fit and balanced pressure distribution ensure a good working posture, preventing knee and back problems. To emphasize this, FENTO chose the tagline: ERGONOMIC KNEE PROTECTORS.

COMFORT, DURABILITY AND ERGONOMICS

The FENTO knee pads are DIN 14404-EN: 2010 certified. All products are the result of many years of development and thorough testing. FENTO is lightweight, flexible and watertight. Comfort, durability and ergonomics are priority.

FOR EVERY DIY ENTHUSIAST

The FENTO POCKET is a flexible inlayer fitting all work trousers. The external knee pad FENTO HOME has an ergonomic wedge providing comfort in all kinds of circumstances. The ORIGINAL and MAX have an ergonomic fit and are perfect for intensive use. The FENTO BOARD is the latest product added to the assortment. This product was developed especially for extra mobility. The FENTO BOARD has the perfect weight: light enough to easily move it and heavy enough to not move while kneeling down.

ALL-IN SOLUTIONS FOR CONSTRUCTION PROFESSIONALS

MEMBER OF THE BERDAL FAMILY

Pandser offers construction professionals all the tools needed for the sealing of roofs, gutters and facades. With this total concept of materials, tools and accessories, we offer the most sustainable and environmental-friendly solutions for several issues related to humidity and air sealing. In addition to the well-known EPDM strips, roof membranes and lead substitutes, Pandser now also supplies reinforced foils, spunbond foils, DPC and construction foils and matching tapes. Professionals will therefore be able to apply Pandser's damming foils to the entire built hull. We are also working on the further development of our PE foils in terms of thickness and packaging of the material.

ADVANTAGES OF EPDM PRODUCTS

The assortment of Pandser mainly consists of EPDM products. This is a synthetic rubber with a service life longer than bitumen and DPC. The material is resistant to a wide range of temperatures, varying from -35 to +120 degrees Celsius. The material is also resistant to UV, ozone and flying sparks, and is permanently elastic.

PANDSER FAST FLASH

Fast Flash is a flexible and fully self-adhesive lead substitute for a fast and secure water-damming seal. This safe, environment-friendly and sustainable finish can be applied directly onto practically all roof materials.

INSTRUCTION VIDEOS FOR END USERS

We provide several services to present our products more successfully. Pandser has its own website, pandser.com, including instruction videos for end users.

EPDM film and strips

Pandser EPDM range

For roofs, gutters and façades

UV-resistant, highly elastic, plasticiser-free roof covering

Root-resistant and ideal for roof gardens and foundations

Certified to be used as watertight layer for flat roofs

Top vapour-resistant or vapour-tight roof & wall membranes

Pandser Top membranes are vapour-barriers, which help to keep insulation material dry, resulting in a longer service life and better heat retention.

The Pandser Top series consists of vapour-resistant, reinforced LPDE membranes and vapour-tight, reinforced aluminium membranes (Pandser Top Alu).

The characteristics of Pandser Top

Pandser Top is:

- Suitable for the warm inside
- Vapour-resistant (Top) or vapour-tight (Top Alu)
- Made of LDPE layers (Top) or aluminium layers (Top Alu)

Description	Item Code	Color	Height	Length	Width	Quantity per pallet	CE Certificate

Top G/Top G XS

For closed facades, Pandser has the Pandser Top G XS.

This reinforced perforated foil is transparent, which makes installation easier. Pandser Top G XS is used as a water-permeable vapor permeable layer on the cold side of closed facades in new buildings and renovations and can be recognized by the blue reinforcement.

The features of Pandser Top G XS

Pandser Top G XS is:

- Reinforced perforated LDPE
- Suitable for the cold outside (closed facades) and soft insulation (e.g. glass wool/ stone wool)
- Vapor permeable
- Available in widths of 1.50 meters

Building film for temporary covering and sealing

Pandser builder's film

Made of regenerated PE

Standard versions are transparent and black, in a range of widths and thicknesses

Pandser builder's film is useful across the board, as protection for various building materials and also for temporary sealing of windows and doors

Various sizes, colours and thicknesses available on request

Aluflex insulating membrane

Pandser Aluflex is an energy saving membrane. Its resistance to moisture keeps insulation dry. Also this membrane provides, due to its reflective properties, a higher insulation value in addition.

Pandser Aluflex is an insulating and vapour-tight reflective film for the warm interior side of a building. The membrane is vapour-tight and consists of two layers of aluminised membrane and bubble wrap. Aluflex is used in roof structures, facades and crawl spaces.

Pandser Aluflex characteristics

Pandser Aluflex is:

- Suitable for warm interior side, such as in roof structures, walls and crawl spaces
- Vapour-tight and insulating
- Consists of two layers of aluminised membrane and bubble wrap

Description	Item Code	Length	Width	Quantity per pallet	CE Certificate
Pandser Aluflex 1,5 x 25M	DWF10150-0301	25 m	1,5 m	6 Rolls	

Multitop UV FR

Pandser Multitop UV FR is a facade membrane for open facades.

Multitop UV FR is UV-resistant, meaning it can withstand sunlight well (maximum joint width of 50 mm and a max. proportion of joints of 40%). In addition, it complies with the new fire safety regulations (fire rating B), making it a safe and secure product.

Multitop UV FR is also suitable as roofing underlay for special roofs, such as those built with the old Dutch roof tiles that don't close seamlessly. The membrane is black and without a print, meaning it does not stand out between the facade claddings.

The properties of Pandser Multitop UV FR

Pandser Multitop UV FR is:

- Foil provided with a Polyurethane coating
- Suitable for the cold exterior sides of constructions (roofs and walls)
- Vapour open
- UV-resistant (maximum joint width of 50 mm and a max. proportion of joints of 40%)
- Fire rating B-s1, d0 according to EN 13501-1 certified and therefore very fire-resistant

Description	Item Code	Color	Length	Width	Quantity per pallet	CE Certificate
Pandser Multitop UV FR 1,5 x 50M black	DWF10150-0202	Black	50 m	1,5 m	40 Rolls	✓

Lead Replacement

Pandser lead replacement with an aluminium expanded metal.

Pandser lead substitute can be used as a water-repellent in façades for connection of façades to flat roofs, for sills and as a replacement for cavity lead and joint lead.

When used to connect a chimney to a pitched roof and a skylight to a tiled roof dormer, we recommend Pandser Fastflash (2nd generation) lead replacement.

In accordance with the instructions for use.

SMART SOLUTIONS FOR TRANSPORT & CONSTRUCTION

MEMBER OF THE BERDAL FAMILY

We believe that everybody should be able to work and to finish jobs without any dangers. Konvox develops and supplies smart high-quality products for professionals and DIY to secure loads and transport goods and to protect people against loose materials.

HIGH-QUALITY PRODUCTS

We supply high-grade lashing straps, lifting straps, tarpaulins, debris bags, Big Bags, scaffolding safety nets, trailer nets and mats for the construction and transport industry. Our lashing and lifting straps are available in different lengths and widths, and meet the highest European safety standards. With our tarpaulins in several sizes, costly construction materials are protected against a wide variety of weather conditions.

MORE SUCCESSFUL AND PROFITABLE PRESENTATION

We also like to think along with our dealers about how we can present our products more successfully and profitably to end users. We support them with complete shop concepts, product demonstrations and instruction videos. We share the latest developments in the field of events and sales supporting resources in our mailings.

Lashing strap

Lashing straps with clamp buckle are used endlessly for easy securing of lighter loads and bundles.

Tarpaulin temporary waterproof cover with eyelets

Lightweight tarpaulins manufactured from an HDPE fabric with LDPE coating on both sides. Tarpaulins have a cord-reinforced and welded hem in which there is an aluminum fastening eye all around at every meter. Each tarpaulin is packed in a PE bag with a neutral and multilingual "Konvox" insert on which, among other things, the barcode is mentioned. Furthermore, standard packaging in sturdy cardboard boxes.

WATERTIGHT HOME IMPROVEMENT

MEMBER OF THE BERDAL FAMILY

Premiumfol is a producer of sustainable EPDM products, foils, lead substitutes, tools and accessories. The ease of use enables DIY enthusiasts to easily and quickly resolve several issues related to humidity and air sealing around the house, garage or gazebo. The extensive assortment includes sustainable EPDM products, technical foils, lead substitutes, tools and accessories.

PROFESSIONAL STANDARDS

The products are developed according to professional standards and have a long operating life. The Cradle-to-Cradle quality mark endorses this brand's sustainability.

THE TOTAL CONCEPT

Besides a complete assortment with solutions for air and water sealing, we support our partners with a total concept. We are happy to think along about how we can present our products more successfully and profitably to end users. In order to achieve this, we provide several services and sales resources, such as online product environments, demo days and instruction videos for end users.

Building film for temporary covering and sealing

Premiumfol Construction film for the DIY market.

Top vapour-resistant or vapour-tight roof & wall membranes

Premiumfol Top consists of a range of multi-layer vapor barrier films for application on the warm side.

Premiumfol Top is a reinforced airtight LDPE foil and is used on the warm side in roof and wall constructions in new buildings and in renovation for constructions, which belong to climate class 2 and 3 (houses, offices etc.).

For very high mechanical loads, this product is also available in a heavier version, **Premiumfol Top XS**.

For climate class 4, as for example in bathrooms, this range consists of an aluminum vapor-tight foil, **Premiumfol Top Alu**.

For e.g. flat roofs, which have EPDM or bitumen as roofing material, the climate protection foil **Premiumfol Top Clima XS** offers a solution for protecting the insulation on the inside of the construction if the construction is post-insulated.

Description	Item Code	Color	Height	Length	Width	Quantity per pallet	CE Certificate

Top G/Top G XS

Premiumfol Top G is a reinforced multi-layer perforated LDPE film, which is water resistant (W2) and vapor permeable.

The transparent color of this foil makes installation easier.

Premiumfol Top G complies with the European standard EN 13859-2 and is used as waterproof vapor permeable layer on the cold side of closed facade constructions in new construction and renovation. It can also be used as a temporary glazing foil for wind and water protection of facade openings during the construction phase.

For very high mechanical loads, this product is also available in a heavier version, **Premiumfol Top G XS**.

EPDM selfadhesive lead replacement

Premiumfol Waproseal lead substitute is a self-adhesive lead substitute with a very high initial adhesion due to the presence of two additional adhesive strips, which makes installation easier.
 Thanks to the high elasticity and high elongation of this lead replacement, it is widely applicable for sealing the connection between roof and chimney or sealing other connection joints on the roof and facade.

Description	Item Code	Color	Height	Length	Width
Premiumfol Waproseal 0,28 x 5 M, Anthracite grey	WKFEP300-2028	Anthracite	30 cm	17 cm	17,3 cm
